Internet Policy Institute's report from the National Workshop on Internet Voting

National Science Foundation (Sponsor), Univ. of Maryland, Freedom Forum (Host)

quantitative guidelines for performance and reliability of voting systems

On October 11 & 12, 2000, the IPI conducted a workshop to examine the issues associated with conducting public elections via computer networks, sponsored by the National Science Foundation (NSF). The workshop was part of a request by the White House to study the feasibility of Internet voting.

The EVOX Voting System

California Voter Foundation

VoteHere

GNU.FREE (Free Referenda & Elections Electronically) - Internet Voting system

of Economic and Social Affairs (UN-DESA)

The Cryptography and Information Security research group of MIT's Laboratory for Computer Science, sponsored by DARPA

Original implementation was done by Mark Herschberg as part of his Master's thesis "Secure Electronic Voting Over the World Wide Web".

In partnership with Compaq, Cisco and Entrust

Part of their research has been the implementation of the EVOX voting scheme, and testing its use in MIT campus-wide student elections.

CVF is a non profit organisation aiming to provide information to those interested in issues of voting technology (systems, standards, legislation etc) VoteHere election systems support private, public and military (!) elections

Design work first started in April 1999 and is progressing. A free software project creating Java electronic voting software released
